

The Great Covid Pandemic: Pfizer, BioNTech, Paycheck Protection Program, CARES Act And Hypochondria

by Joseph Warren, Editor
<http://TheIndependentDaily.com>

“Data, data, data. I cannot make bricks without clay.”
- Sherlock Holmes

(Quick Start Guide: Start at the section below entitled, “Hypochondria”)

I’ll begin this article by saying that I strive to examine every bit of data (within the scope of what is available) to completely understand why people do the things they collectively do. It’s a reflection of my education and interests. And, like President Trump on camera when we were being briefed on the impending Covid apocalypse we faced as a nation, I think I wore the same look of confusion as he, finding myself completely and rationally disconnected from the hysteria of the moment as the words of the many “experts” marched before us and the mania took root and grew.

Those who denied the severity of the disease were cast by the Popular Media as fools or *right-wing anti-vax crazies* who, for some dark and unknown nihilistic reason privy only to the condemning, wished to see humanity suffer for its foibles. It was as powerful a response to the opposition as it was in March 2003 against those of us who opposed the *invasion of Iraq*, and about this I know much, personally and deeply, and to today still carry an abiding hatred for George W. Bush, Dick Cheney and the rest of the co-conspirators.

The fervor for the invasion of Iraq was incited by a collective of the same influencers, interestingly enough, as Covid: the Internet and major Media outlets thoughtlessly followed the seemingly inviolate preponderance of what had become apparent, overwhelmingly ignorant, unread, mindless opinion, marching in lock-step and painting all others as ruthless and uninformed un-American-Americans, while those who supported the agenda brought more and more bullshit to the airwaves and screens of our country and the World in the form of patriotic songs (albeit *Country and Western*) and speeches designed to foment more and more hate. In 2003 the target was a benign, *non-virus virus known as the Iraqi people*; in 2020 it was in opposition to some nebulous not-very-attractively-formed microscopic, multi-horned cell – a terrorist of the most clandestine kind, and foretold to be equally as deadly – a Biological Terrorist, adding a new name to the War on Terror, *Ansar al-Covid*, an influenza-like illness dressed to kill.

Cui Bono?

In 2003, Shell, BP, Mobil-Exxon, and others, including Dick Cheney's Kellogg, Brown & Root (KBR). But that's water over the dam and too long ago to serve as an intellectual reminder for today's sodden-headed majority.

The other day Ted Cruz was in the news criticizing former-President Trump's chief accuser's actions as being most akin to those of a *Banana Republic*, and while it's true that everyday we become more *Banana-like* in our society, evidenced by more flagrantly inflammatory rhetoric on the part of both Right- and Left-leaning politicians and advocates, and perhaps even to the extent that the charges against the former President are unfounded to some level or exaggerated (only time will tell), no action is more consistent than the time-honored act of *Raiding the Treasury*. History is absolutely laden with former *Banana leaders*, who absquatulated with the country's wealth, many times seeking, and being granted, asylum here in the United States. The list is too long to narrate herein.

Let me be clear: Donald Trump did not do that. So, *Who benefitted from the trillions of dollars in outlay in the last three years?*

You may remember, but probably not given our collective lack of recall of (even recent) historic events owing to the tumult of real and imagined news flashing across our phones and computers daily, that our former President Trump had embarked on an epic battle against the Pharmaceuticals industry raging against drug prices and threatening to take punitive measures against manufacturers and those who co-conspired to further inflate and control ridiculously-priced drugs on which many Americans depend to maintain their daily physical stasis.

Chief among this list of greed-frenzied rogues was our Health Care system and Pfizer, along with other, lesser players which collectively mastered the practice of *Drug-based Medicine*, supplanting the friendly neighborhood doctor with a prescription pad, a wholly non-interventionist approach to the practice as it was known when I was young, and perhaps I understand why: Our legal system has so debauched the practice of Medicine turning it into a privatized *Lottery*, leaving those who practice the *Art or Science*, reeling and stunned by Malpractice premiums and humiliation.

So, *Cui Bono?* Probably those who despised former-President Trump thus successfully taking down a pretty robust economy and making him an easier candidate to defeat. As an example, Pharmaceuticals, Health Care overall, maybe an international evil cabal of *Left-Leaners*, (anything's possible and Mr. Trump made many enemies during his relatively short four-year term) and, not to be forgotten in the blood lust of the moment, every one of us was even thrown a fish – a very small fish, mind you, but a fish, nonetheless. (You may remember receiving a check or two or three from the government. Some of our more creative fellow citizens flagrantly and illegally pursued and received millions of dollars each in *PPP* compensation; some have been caught; most will not. I know of a few who ought to be legally chastised, but I also know that they won't: Too many fish in the sea.)

Fast forward from Covid's arrival and Trump is defeated. Before Covid, Biden didn't have, as Ray Chandler might have said, *A Chinaman's Chance* of defeating Trump. The Opioid crisis is now averted and supplanted by imported Fentanyl, not something America's Big Pharma is putting on the streets, *I guess*. We have once again breached the always-growing debt ceiling. We're living on borrowed time and money. Our attention is diverted from the catastrophic events unfolding today by fevered discussions by and about people who want to be recognized as *outstanding citizens* for their sexual practices, and the continued fight over the right of a woman to abort an unwanted fetus continues to be argued and decided *principally by men*.

China has the audacity to want to be treated as an equal after centuries of US and British hegemony and abuse.

Russia is doing what Russia has always done, but today we are shocked.

Israel continues its *extermination of the Palestinian people* that began in 1949 with the *Nakba*, demonstrating that they thoroughly learned how to apply the successful techniques of their emulated Nazi heroes.

A grocery cart of food remains about 100% higher than it was just three years ago, after every food and related purveyor realized that they might as well cash-in on the Covid hysteria. Even the chickens were frightened for months, failing to lay eggs, and the cows wouldn't yield milk. The pigs apparently left for an extended vacation, and all of those people who fought for an increase in their hourly wages bringing the minimum to a new high, awoke to find that their rent, gasoline, food, utilities, and all other costs associated with day-to-day life had risen far beyond the meager upward change for which they feverishly fought, consumed by the greed of those who control the rest of us.

Quick Start Guide

I want to apologize: Back in 2020 when we first downloaded the Pfizer Clinical Trials report identified in the article just below, I, the man who professes to not miss much, missed something very important and telling. Open the pdf at <http://theindependentdaily.com/pfizer.pdf>.

Go to *Page 8*. Beginning there you will see evidence of what happened to us as a nation and globally. Follow the columns for *Placebo* (you know, water with a little salt – Saline Solution, a little more than half a teaspoon of fluid per injection) and the various doses provided for this, the *Control Group*, and you'll see that too many of those injected with *nothing* experienced symptoms consistent with the actual vaccination and injection of COMIRNATY (the name of Pfizer's do-nothing miracle drug).

As an example, after Dose 1 of *Nothing (Saline)* 975 of 2,908 experienced Headache. 199 had Chills. 36 Vomited. 323 had Diarrhea. 398 had to take some form of painkiller. In short, debilitating side effects from being injected with nothing. (I omit any discussion of findings regarding muscle pain, redness at site of injection, and so on, since they may

occur from just the act of being stuck by a sharp object.) This is not a group one would want to dine-out with.

What or Who manifested Covid? A Chinese Wet Market? A leak of weapons grade poison? An Alien intervention? A naturally-occurring mutation in a formerly benign virus?

The Virus of Fear. Each one of us was inundated by the flood of hysteria stemming from the corrupted and deceitful data generated during this early part of the crisis and continuing for two years following until this “Program’s” goal was achieved. ***Your Twitter, your Facebook, your TikTok, or whatever it is, were complicit.*** Few were above the mythology. (We were here with the TID, but that goes without saying, I suppose. We were critical from the first.) This phenomenon is what Gustave Le Bon would have referred to as a mass-hysteria, but in this case, mass-hypochondria, or, as it has been known and practiced for centuries *Mass Psychogenic illness.*

*That is what happened, and this characteristic or tendency of shared human behavior was **Weaponized** to this end. It’s neither the first, nor will it be the last.*

During the early days of the crisis when someone asked by when I thought the threat might recede, I usually responded, *Sometime after Election Day.* To me, it was heuristic. As Joseph Smith was fond of saying, *And it came to pass.*

Now, move down to Page 17 of the report and read where I have italicized the paragraph:

“Efficacy Against Severe COVID-19

Efficacy analyses of secondary efficacy endpoints supported benefit of COMIRNATY in preventing severe COVID-19. Vaccine efficacy against severe COVID-19 is presented only for participants with or without prior SARS-CoV-2 infection (Table 6) as the *COVID-19 case counts in participants without prior SARS-CoV-2 infection were the same as those in participants with or without prior SARS-CoV-2 infection in both the COMIRNATY and placebo groups.*”

In other words, ***No Statistically Significant Difference (Benefit).*** Take a dose of Saline or of COMIRNATY: The result’s the same, except to Pfizer. They’d prefer you fell in line and believed the hysteria.

In the article just below, “Mass Shooting,” you will find a chart offered by the Los Angeles County Health. In it you’ll see that those who would have died from some terrible yet understood disease found a temporary reprieve from their specific illness, dying instead of the *mysteries of Covid.* Thank God, no?

We really must read and think more, people. Try to do better in the next existential crisis, will you?
