

## The Greatest Pandemic of All Is Here!

Washington DC is Apoplectic by Startling Revelation!

CDC Discloses: Every Day Thousands of People Around the World Die of This Disease!

President Biden Proposes Another Trillion-Dollar Payout for Vaccine to (Again) Pfizer!

Hospitals Plead for Trillions of Dollars in Assistance: "Our emergency rooms are full! We're overwhelmed! I'm so tired I can barely stuff this cupcake in my face!"

*Who Was Patient Zero:*

Her Royal Highness, Queen Elizabeth Succumbs to Death by Something Termed, Old Age!

"I've never seen so many old people who are dying like this here!" said Rebecca Phatarse, a Healthcare professional in Macon Georgia. "They're dropping like pants at a bachelor party, which I used to work *before* becoming a licensed clinician, you understand."

And so they were. By one account in Macon alone, several thousand people are expected to die in the next few years as a result of *Old Age* and, sadly, there is nothing we can do about it until the Pharmaceuticals industry develops a vaccine, *which they must* before it is too late!

In San Francisco, in New York, in Paris, Rome, Berlin, Kingman, and even in Boise, great numbers of our fellow citizens are succumbing to this "*Mega-Killer*" as the CDC's Chief of Hyperbole has termed it, Dr. Maximillian Juberg.

And he ought to know: "In my earliest years of practice at *Our Lady of Irrational Phobias* (a Rosicrucian hospital in Miami at which he served his residency) I saw maybe one or two cases of Old Age death every year. That was it! For the last two years before the death of Queen Elizabeth everyone just died of Covid, and I mean everyone! It was great for us: It brought in a lot of money. Sure, they were mostly fat people who freaked out and others who drank themselves silly, but this...this is different! This is frightening. We should all be chilled by the likely outcome of this newly-discovered disease."

TheIndependentDaily.com (TID): How? How is this different Dr. Juberg?

"Both fat people and skinny people are all dying now sometime after experiencing the early signs of the illness, and we have no explanation. They just seem to expire, you know, like the way Joe Biden will be talking along and suddenly his eyes seem to cross, and like that! (Dr. Juberg snaps his fingers.) He's gone for a moment or two. But, in this case, although the expired person may look very much like Joe Biden, the effects are somewhat longer lasting."

TID: How much longer does it last? Like a month or so?

“Maybe a month. Maybe two. But you’ve got to remember that all brain functions completely stop, so you could wake-up a year down the road brain-dead, or, you know, as a Trump supporter. In that time – the time you were dead, you would have missed a lot of important stuff on Facebook and television.”

TID: That’s chilling!

“It is. And your Pool Guy will probably be boning your wife, and your car will be repossessed, and, if things continue the way they have, your IRA will be down to about thirty-eight cents. So, really, you’re better off if you stay dead.”

TID: Do you consider this a virus, then?

“Yes. It’s definitely a virus. How else could we get the federal government to hand over vast sums of America’s wealth and pass it off to Healthcare “Professionals” and, of course, Joe Biden’s principle funding source, Pfizer?

TID: I notice you said “Professionals” in quotes. Why was that?

“Did I? You’re the one running the keyboard. Just stop inserting quotes.”

TID: So what are you going to call this virus?

“What else: the *Omega Virus!*”

TID: A very clever biblical reference, Dr. Juberg. And I want to thank you for your time, which I know is limited because as I understand it you have tested positive for the Omega Virus yourself have you not?

“Yes. And I’d ask that everyone immediately get tested for the Omega Virus at your local hospital. It costs only about fifty-dollars per test and diagnosis. That’s a lot of peace of mind for not much money. You owe it to your loved ones... You owe it to Pfizer.”

TID: Thank you, Dr. Juberg. Is there anything you’d like to add?

“You forgot the close-quote about seven paragraphs above after the word Pfizer and before the question mark.”

TID: Thank you.

The Centers for Disease Control recommends that you immediately wear a mask, latex gloves, a condom, hospital gown with no underwear beneath, and keep a thermometer inserted in your rectum at all times. It is best to stay away from everyone including those you do not know, and avoid touching of any kind, including of another person’s private areas, and “that includes the breasts,” per Dr. Juberg.

The *Omega Virus* is not something to be taken lightly:

*It's the only way to divert our attention from how poorly the country is being managed.*
